Display results: ıldığı On screen emales Export to file (CSV)  Search

I am missing the results for a candidate or some candidates. Why is this?
Above is an example of how results are displayed on screen.
Above is an example of results displayed in a CSV file.
Regular candidate search is limited to 20 results. However, if you have a bulk load of results to check, the Multiple Candidate search allows up to 1,200 search results.

A Multiple Candidate search template will need to be completed and uploaded.
The Multiple Candidate search template is similar to the CSV file produced during a regular candidate search.

Once complete, the template should be uploaded onto the Multiple Candidate search page. Results will only be expressed in a CSV file.
When a Direct account has been created, the user is contacted via email by a Customer Services representative, who confirms that the account is active as well as providing their user name and password.

It has recently been agreed that the Recognition Manager for that region can be copied into these emails if they wish. This is so the Recognition Manager is made aware, in real-time, of recent contact from an institution in that area, rather than waiting for the monthly update. This could then be converted into a potential opportunity to gain a statement of recognition or update a contacts grid.
