Types of Post-Secondary and Higher Education Institutions in former Yugoslavia

(all institutions are public)

Univerziteti (Universities)

To be recognized as a university, an institution has to have at least 3 faculties

Fakulteti (Faculties)

Visoke škole (Advanced schools or “High” schools)

(Specialized university-rank schools offering 4- or 5-year programs of study)

Više škole (Higher schools)

Post-secondary institutions

Vocationally oriented

Provide less than full university-level work

Academies

Programs in specialized fields, usually arts, at university level

Affiliated to universities

Study Programme title: Undergraduate studies in Biology - Bachelor's degree
A person who completes the four-year undergraduate study course in biology is awarded Bachelor with Honours in Biology.
The Study programme objectives:
The aim of the study programme is education of professionals in the field of biology. In this study programme, a student develops general aptitude for acquisition, analysis and synthesis of the core knowledge of biology, and relates biology to other natural sciences, develops an understanding of the biological diversity foundations, and interactions of living systems with the environment. The structure of the study programme ensures the acquisition of foundation knowledge in natural sciences through the curriculum based on general theoretical and methodological courses. In the further course of study, knowledge in the field of the biosystem structure, organization and functions - at the cell, organism and population level - is expanded through a group of scientific and professional application courses. The concept of the study programme enables students to gain experience of learning, adopting a positive attitude towards research of living organisms and the environment and develop scientific critical thinking on key issues in the field of biology. By selecting one of the modules offered in the final year of the study programme, students more intensively focus on complex models, concepts and modern methodological issues in the field of Biology or Molecular Biology. The level of acquired competences and skills ensures correct application of fundamental biological concepts, independence in applying the knowledge and skills of good laboratory practice, as well as the application of standard field material collection methods to adopt academic values and of colleagues, the environment.
